You will receive a zoom link via email

Cost: Free

Does your child have a 504 plan or an IEP that calls for health services at school?

According to the [2019-2020 Oregon School Nursing Report](#), there is only one nurse for every 4,572 students—six times over the recommended number. How has this shortage affected your child with special health needs?

Please join this small-group discussion to share how you have managed the need for health services at school. Learn from others who share your experience and get ideas for getting help.

Table Talk is limited to 10 participants.
