# WORLD BLOOD DONATION DAY

14<sup>TH</sup> JUNE

DONATE  
BLOOD

Your **1** donation  
of **blood**  
can save up to **4** lives!

## GIVE BLOOD: HONOR WORLD SICKLE CELL DAY!

Typical red blood cells usually live for about 120 days before they need to be replaced. But sickle cells usually die in 10 to 20 days, leaving a shortage of red blood cells. Without enough red blood cells, the body can't get enough oxygen. Blood is a part of sickle cell treatment to help save lives. Give blood today and help save a life! Use the QR code to schedule your blood donation.

Interested in testing  
for sickle cell trait?
